

Primax

international

THE EUROPEAN X-RAY MANUFACTURER GROUP

Who we are

PrimaX International was founded on 1st October 2001 by major european X-ray equipment manufacturers, with more than 25 years of experience in the concept and production of medical imaging systems, as their global sales channel.

PrimaX International is the natural extension of the production sites in France and Italy, and thus benefits from the know-how, common resources, innovation and complete support of the manufacturers.

What we do

PrimaX International offers a complete range of interventional and radiological units which cover all the radiological needs. It comprises moreover digital imaging processing systems with image intensifiers and flat panel detectors as well as their networking thanks to their DICOM 3 compatibility.

Why choose PrimaX

PrimaX International is a modern, industrial, humane and competitive alternative due to its international network, its efficient after-sales service, its fully integrated systems and last not the least due to the excellent price-quality ratio of its product range.
